The public schools teach al-most every known most every known
but the one most
important branch
of all. What does
it profit your son
if he has an intellect like a Newton,
and is mentally an
Admiral Crichton,

and is mentally an Admiral Crichton, if he has a weak and puny body and not the remotest idea of how to care for his health? A boy should be taught from the start that his health is his most precious endow-

ment. Without health, all the talent, all the genius, and all the ambition in the world are worthless. A boy should be taught that success in any walk of life, that happiness, and life itself, are dependent upon his care of his health.

When a man feels that he is the success in any walk of life, that

happiness, and life itself, are dependent upon his care of his health.

When a man feels that he is losing his health and vigor, when his cheeks no longer glow, his step is no longer elastic and the sparkle of health is no longer in his eyes, he should work less, rest more and resort to the right remedy to restore his bodily vigor. Dr. Pierce's Golden Medical Discovery is a natural medicine—a scientific medicine. It does no violence to nature. It works with and not against nature. It promotes the natural processes of secretion and excretion. It imparts vitality and power to the whole system. It gives plumpness and color to the cheeks, sparkle to the eyes, steadiness to the nerves, strength to the muscles and the animation of health to the whole body. It makes the appetite keen and hearty. It is the great blood-mak r. flesh-builder and nerve-tonic and restor. ive. Medicine dealers sell it and have absolutely nothing else 'just as good.'"

"I was afflicted with pimples and boils, and running sores on face and neck," writes Robert S. Wert, Esq., of No. 615 Galloway Ave., Colum-bus, Ohio. 1 'ook Dr. Pierre's Golden Medical Discovery and Pleasant Pellets,' and was cured."

Constipation is the commonest beginning and first cause of many serious diseases and it should always be treated with Dr. Pierce's Pleasant Pellets used in connection with the "Discovery." These are the most perfect natural laxatives and permanently cure.

Saving Silver at the Mint.

Perhaps the most interesting scheme for the recovery of waste silver at the local mint is that applied to the utensils of the melting gang. The big iron stirring rods, the dippers, the strainers and the ladles that come in contact with the molten metal are laid aside at intervals and sent down stairs. They are covered with what looks like brown rust, but is really oxidized silver.

Suppose, to digress a moment, one desired to get a coat of paint off the outside of a house. In such event the plan of scuaping away the house and leaving the shell of paint standing would be regarded as somewhat eccentric, yet that is substantially the method adopted at the mint. The implements are placed in baths of sulphurie acid, which attacks the iron or steel, but leaves the silver untouched. Little by little a strainer, for instance, will entirely disappear.

That is to say, the original strainer disappears and leaves in its place a hollow silver counterpart, delicate as an eggshell. They are very curious, these fragile casts. Their surface is a sort of natural filigree, honeycombed with innumerable fantastic perforations. The reproduction of a bolt or screw is sometimes as perfect as an electrotype, but they are hurried remorselessly back to the crucible and thus pursue their cycle until at last they find their Karma In a minted coin.-New Orleans Times-Democrat.

Wills of Some Women.

"Some women derive a great deal of enjoyment out of making their wills," remarked a lawyer the other day. "They change them as often as they change their gowns. It is only a few days ago that I came down to my office to find one of my fair clients anxiously awaiting me. She was in a great state of nervousness.

"'Oh, Mr. Blank,' she exclaimed, 'I've

come to change my will.'
"'What! Again?' I asked. "'Yes,' she said. 'I discovered last zight that Mrs. - whom I had intended to leave my diamond tiara to, has been saying spiteful things about my poor, dead husband-said he made his money out of green grocery and an off beer license-odious creature that she is. I could never rest in my grave if I thought she would benefit a farth-

ing's worth from my death. "'Cross her off the will, please, Mr. Blank, and substitute the name of-let me see, now; whom can I leave the diamond tiara to? Well, I'll think it over tonight and come and see you in the morning.

"And so on," continued the man of law. "That good lady changed her will six times in as many months, and the names in it would have filled a small directory, while the rest of it suggested an auctioneer's catalogue."-London Mail.

Oriental Judgment on Mixed Bables. The Greek ecclesiastical authorities at Aleppo have been called upon to decide a case which strongly recalls Solomon's famous judgment. By a strange coincidence a woman and her daughter both gave birth to a female child at the same time. But the babies got mixed, and, as one of them was ugly and the other pretty and healthy, both mothers claimed the latter. The elder woman maintained that, as all her other children were handsome, the ugly child could not be hers, while her daughter claimed that, being young, handsome and strong, she could not be the moth-

er of a weak and ugly babe. The religious chief of the town settled the affair in a summary way. He adjudged the beautiful child to the daughter on the ground that, it being her first, the occasion was not to be made one of humiliation and disappointment, while the elder mother could afford to forego her claim since she had already had several handsome children.—Constantinople 'Malumat.

A Wonder Flower.

The Canadian Manufacturer reports the remarkable phenomenon of the discovery of a flower ineased in a hole in an old fron casting, the flower being in a parfect state of preservation. A work-

man engaged in breaking up old fron at a foundry in Ontario came across an old wheel that had done service on a stationary engine for many years. On breaking it he discovered in a crevice a flower blossom in perfect condition, its color being as fresh as the day it found its way into its mysterious hiding place. It had evidently fallen into the casting when it was being poured, and in some manner escaped injury from the molten metal. As the cavity was perfectly airtight it naturally retained its freshness until exposed to view.

Her Lucid Reason.

"Don't you wish," he asked, looking soulfully into her eyes, "that the tunnel on this line was ten times as long?"
"No," she answered.

It struck him like a dash of cold water in the face. Instantly it dawned upon him that she no longer loved him. "They always light the car lamps when coming to the long tunnels," she added, "and they don't for the short nes."-Chicago Post.

Reverent, Though Drunk.

The large majority of Russians of the orthodox faith will not pass a church or shrine in the street without uncovering their heads and crossing themselves. Travelers have seen intoxicated men who were staggering along observe this ceremony, and in the case of those who were too helplessly fuddled to walk home the friend or relative who has accompanied a tipsy companion in a sledge or drosky has, while holding him in the vehicle with one hand, performed for him the sign of the cross with the other when passing a sacred place.

A BREEZY TIME. Number 3.

O 3 of the earliest election contests that arose out of the application of the Australian ballot law took place in Esmeralda county.

Patsy Bowler and Sardis Summerfield, the present United States District Attorney, were retained by the contestants. The case was tried before Judge Mack, before whom the ballots were spread out. The judge took up each ballot in turn, and it was St

passed or objected to by the litigants. Finally one of the ballots was On read and an objection immediately entered. One of the attorneys found | Bu a fatal flaw in it. What seemed to be a pencil stroke extended from end to end. Mr. Summerfield interposed the objection:

"This ballot bears a distinguishing mark."

Debate upon the matter was fast and furious. Decisions bearing upon the point were read, and arguments were advanced. The breezy discussion caused such a draught that the judge presiding was impelled to suceze. The mark disappeared. It was conceded by both the contesting parties that what they thought was a distinguishing pencil mark was only a hair from the beard of a Populistic judge of election.

NEWS OF SOME

Great Activity in the Eastern and Central Portions of the State.

Sol Hilp received in a recent letter some interesting information relating to mining operations in eastern and central Nevada.

The news from Ely is very favorable. Miners and prospectors are rustling hard with good results.

Within a day or two past an expert mining man of Salt Lake City arrived in the district. He will stay two weeks and look at mines in that vicinity. Success in the enterprises now under way there will mean a great boom for that part of the state.

Two of the gold mines there are being worked and their ores reduced with aplendid results.

Mr. Bray, who is the agent for the eastern parties who bonded the copper mines, has now a number of menemployed and is enthusiastic over the prospect, declaring that the copper mines of Ely are quite the equal of those near Golconda.

Concentration of lead-silver-gold ore ts being carried on successfully.
